

A made-to-measure approach to managing your wealth

We have been operating in the Principality of Monaco for 10 years, and we offer a made-to-measure approach to managing your wealth. We give you the tools you need to manage your assets while benefiting from a range of lending options and payment methods.

Wealth management

We carry out a wealth assessment in order to offer you the best services possible – direct management, advisory management or discretionary management. We can study the possibilities for leverage with a Lombard loan.

We give you access to all the major markets so that you can carry out your operations in all the main currencies.

Lending and loans

If you are planning to invest in property, we can help you with our range of mortgages, or loans against other guarantees.

If you are planning to acquire a vehicle, we can help you with credit or leasing.

If you are planning to acquire a boat, our specialist Marine Azur can help you. ➔ [Marine Azur website](#)

Account management and payment methods

We give you access to **payment methods** so that you can operate your account with a full range of cards (Visa, Premier, Infinite, etc.)

We let you manage your accounts in all the main currencies.
